Société Suisse de Rééducation de la Main
Società Svizzera per la Rieducazione della Mano

Guest Society:

**SOCIEDAD ESPAÑOLA
DE CIRUGÍA DE MANO**

Dear colleagues,

In 2025, the congress will again be held in **Lugano**, in sunny Ticino. Over the course of two days, we will examine and discuss key topics in hand surgery and hand therapy. The exchange of valuable experiences will be of particular importance.

The focus of the congress will be on the **strength of the collaboration** between the two societies, SGH and SGHR, and the synergies that arise from this partnership. Together, we can face the **significant challenges** of the years ahead. As the saying goes: In unity there is strength – together we are stronger.

L'UNIONE FA LA FORZA!

The **distinguished programme**, with renowned speakers, will cover the following topics:

- Arthroscopy in hand and wrist trauma
- Update on Kienböck's disease
- Reconstruction of the scapholunate ligament: evidence vs. eminence
- The "unusual" peripheral nerve compression syndromes
- Artificial intelligence and new technologies in hand surgery and rehabilitation

We are especially delighted to welcome the **Sociedad Española de Cirugía de Mano** as our guest society and look forward to a congress in 2025 that will be both enriching and inspiring!

**With best regards,
The Congress Committee 2025**

On behalf of the SGH Dr. Ivan Tami
Prof. Maurizio Calcagni
Dr. Torsten Franz

On behalf of the SGHR Tamara Hauri
